

## Caregiver Training Series

Recently enacted Federal law, reauthorizes and provides **full funding** for the “Money Follows the Person” (MFP) program, enabling certain Medicaid beneficiaries a greater ability to stay at home and receive care, rather than enter or remain in a Skilled Nursing setting. **This will fuel the already growing need for Caregivers, who can assist patients with basic activities of daily living in their homes.**

This **affordable and comprehensive** series of **28 Caregiver Training programs** is designed to provide Caregivers with 14 hours of healthcare education, in a simple, easy-to-follow format, that will enable them to obtain the skills necessary to provide more effective and safe care to their patients.

Caregivers can access these courses anytime, anywhere, on any device with an internet connection, including mobile devices and earn certificates of completion upon passing the post tests. The titles in this series are:

1. Introduction and Roles of the Caregiver
2. Ethics
3. Documentation
4. Communication
5. Infection Control
6. Cultural Competence
7. Understanding Behavior of the Client
8. Client Roles and Socialization
